## < soft skills >

- Teamwork
- Assertive communication
- Self-learning
- Adaptability
- Creativity
- Professionalism
- Problem solving

## < about me >

Hi! I'm a front-end developer, a systems engineering graduate and an English teacher. I'm fueled by my passion for learning about technology, visual design, and English since I strongly believe that we are forever students. My experience has taught me to be flexible, analytical, sympathetic, a risk-taker, to assume leadership roles, and that I enjoy solving problems.

## < front end experience >

### Burger Queen

Web application that allows fast food restaurants manage their orders.

### Md-Links

A command-line interface and a library that allow users to identify the available and unavailable links inside a markdown file from a given path.

### Social Network

Web application that allows animal lovers to sign up and log in a social network, so they can add posts, like, delete, and edit what they have posted.

### Data Lovers

Web page that allows users to navigate through interesting data from Harry Potter.

### Card Validation

Web application that allows users to validate credit/debit card numbers.

## < work experience >
